ABOUT ME :

I am Srijan Chatterjee, a B.Sc. Data Science graduate from Techno India University with strong skills in SQL and Python, along with intermediate knowledge of MS Excel and Google Sheets and basic knowledge of HTML. I have a strong interest in DevOps, Cloud Computing, and Technical Support, with a passion for troubleshooting, problem-solving, and learning modern IT technologies. I also bring strong leadership and communication skills, developed through my experience as Cultural Captain at Jyotirmoy Public School. Alongside technology, I am passionate about music, which has strengthened my creativity and teamwork. I am currently seeking an entry-level Technical Support or IT Operations role where I can apply my technical skills, contribute effectively, and grow within the IT industry.

SKILLS :

LANGUAGES: PYTHON PROGRAMMING, SQL, HTML
VIRTUAL EDITORS: PYCHARM, VSCODE, SQL WORKBENCH, ORACLE DATABASE EXPRESS EDITION
OPERATING SYSTEM: WINDOWS
ADDITIONAL TOOLS: MS EXCEL, GOOGLE SHEETS, POWER BI, Antigravity (AI Assisted Full Stack Development)

EDUCATION : BSC. DATA SCIENCE FROM TECHNO INDIA UNIVERSITY, SALLAKE , KOLKATA

EDUCATIONAL PERFORMANCE :	<u>Class X</u>	<u>Holy Cross School (ISCE)</u>	88%
	<u>Class XII</u>	<u>Jyotirmoy Public School(CBSE)</u>	72%
	<u>Graduation(BSC Degree)</u>	<u>Techno India University</u>	6.73(CGPA)

EXPERIENCE - FRESHER : Teacher Operations Intern — Connect2Learn Internship_Completion_Letter
MARCH 2025 – JUNE 2025

- Provided operational and software-related support to 100+ teachers across international learning platforms.
- Assisted in issue resolution, coordination, escalation handling, and platform usage support.
- Managed communication between teachers and operational teams to ensure smooth workflow.
- Maintained performance tracking records and operational reports using spreadsheets.
- Developed strong problem-solving, multitasking, and client communication skills in a fast-paced environment.

MY PROJECTS :

Student & Employee Database Management System:

Educational Institution Project — Jnanpith Shikshayatan

- Developed a database management system using FastAPI and SQLite for managing student and employee records.
- Implemented separate Admin and Owner password authentication systems for secure role-based access.
- Integrated a Statistical View Mode for institutional data analysis and monitoring.
- Built backend APIs and SQL-based operations for efficient data management and retrieval.
- Utilized VS Code and Antigravity virtual environment for development and project management.
- Leveraged AI-assisted development to improve backend workflow and implementation efficiency.

Technologies Used

- Python
- FastAPI
- SQLite
- SQL
- VS Code
- Antigravity Virtual Environment
